

LAB INSTRUMENTS, PILOT RANGES PRODUCTION MACHINES FOR PHARMACEUTICAL COATING

FOR FILMS, PAPER, TEXTILES, NON-WOVEN, ETC.

GENERAL DESCRIPTION

Mathis does produce several machines and instruments for coating developments and different kind of applications, on materials such as foils, films, paper, textiles, non-woven, amongst other to attend **Pharmaceutical Industry**. Systems as coating knife (doctor knife), Meyer bar, kiss-roll, engraved rolls, hot melt, immersion, lamination and conversion, revers-roll, with drying, polymerization.

Machines for continuous and discontinuous coating.

Customized machine designs according to the needs.

Modular machines for specific applications according to each kind of product.

Machine can also be complemented with third-party modules and/or complement the customer's existing machines.

Roll width up to 1 meter.

Machine for Transdermal patches

Continuous coating and laminating machine

Customized modular machine according to request

Medical gauze tape bleaching machine

Transdermal patch coating machine

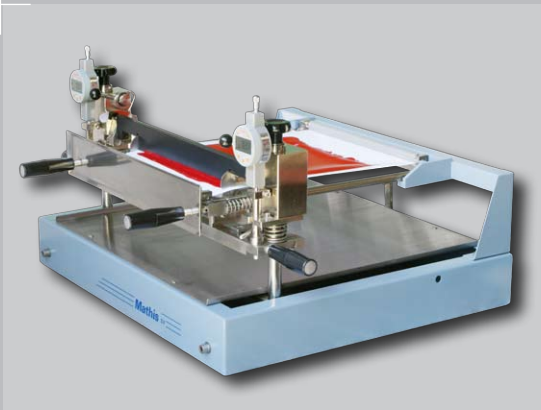

Medical gauze tape impregnation machine

Special machine designs under request, for roller width up to 1m.

Dental floss wax application machine

**Lab instrument for knife coating
Type SV-B / SV-M-B**

Optional: motorized

doctor knives, Meyer bar,
laminating rolls

**Lab infrared pre-heater
type IR-K-B**

**Lab Steamer & Hot Air dryer
type DH-e**

**Lab hot air dryer with coating head
type LTE-S-B**

**Mixers with several mixer
heads and/or roto & stator sets
type MSM-B and MST-B**

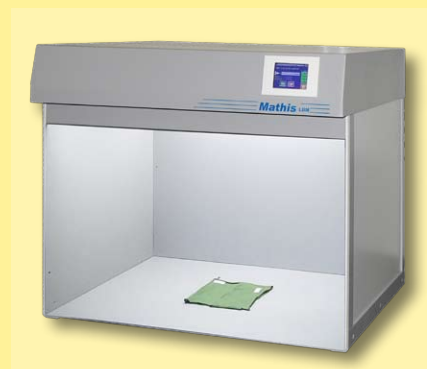

**Vacuum lab mixer
(Desiccator)
type LPE-B**

Automatic circular sample cutter
(75mm up to 140mm diameter).

Light booth according to norms for visual color evaluation with 4 standard illuminants type **LBM-B**
